API Subscription Journey

STEP 1

Receive email from SSG to onboard APIs STEP 2

Request <u>API</u> subscriptions

STEP 3

1. Browse APIs available and try them out using the SSG API Testing App*

The testing application is used to help users kickstart application development.
Find out more here!

2. Once subscription request is granted by SSG, test package will be provided.

*Only the 15 mandated APIs are available

STEP 4

conformance test in UAT with test package provided STEP 5

Fill up actual test results from test packages for SSG verification STEP 6

Once verification is complete, production access will be granted for user
